Mr. D. B. Vassallo, Chief  
Pressurized Water Reactors  
Branch No. 1  
Directorate of Licensing  
U. S. Atomic Energy Commission  
Washington, D. C. 20545

Dear Mr. Vassallo

The fixed gaseous and air particulate monitors and the readout provisions, which your June 11, 1973 letter indicated would be required for the control room, fuel-handling and storage area, and the radwaste area, will be provided.

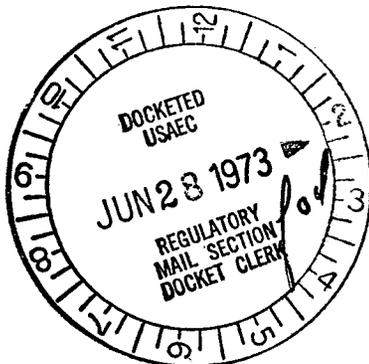

A technical description of these monitors will be incorporated into Section 11 of the Indian Point Unit No. 3 FSAR as soon as details regarding monitor configuration, location and specification are finalized.

Very truly yours
