Re: Indian Point Unit No. 3
Docket No. 50-286

Director of Nuclear Reactor Regulation
ATTN: Mr. Robert W. Reid, Chief
Operating Reactors Branch #4
Division of Operating Reactors
U.S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Reid:

By letter dated August 29, 1977 we submitted our response to your letter dated June 3, 1977 concerning emergency power systems for operating reactors. As indicated in our letter, appropriate technical specification changes are in preparation. Subsequently, discussions with the Regulatory Staff have led to scheduling a meeting for early October between Con Edison and the Regulatory Staff to discuss among other subjects technical specifications for emergency power systems.

The aforementioned discussions with the Regulatory Staff are expected to be very useful in the preparation of meaningful technical specifications. Therefore, we are revising our schedule for submittal of appropriate technical specification changes until after the October meeting. It is anticipated that our proposed technical specification changes will be provided in early November, 1977.

Very truly yours,

William J. Cahill, Jr.
