Figure 6.2-2 Facility Organization

6.5.2 Nuclear Facilities Safety Committee (NFSC)

Function

6.5.2.1 The Nuclear Facilities Safety Committee shall function to provide independent review and audit of designated activities in the areas of:

- a. reactor operations
- b. nuclear engineering
- c. chemistry and radiochemistry
- d. metallurgy
- e. instrumentation and control
- f. radiological safety
- g. mechanical and electrical engineering
- h. quality assurance practices
- i. environmental effects
- j. other appropriate fields associated with the unique characteristics of the nuclear power plant

Composition

6.5.2.2 The Committee shall have a permanent voting membership of at least 5 persons of which a majority are independent of the Nuclear Power Generation Department and shall include technically competent persons from departments of Consolidated Edison having a direct interest in nuclear plant design, construction, operation or in nuclear safety. In addition, persons from departments not having a direct interest in nuclear plant design, construction, operation or nuclear safety may serve as members of the Committee if experienced in the field of nuclear energy. The Chairman and Vice Chairman will be Senior Officials of the Company experienced in the field of nuclear energy.

### Meeting Frequency

6.5.2.5 The NFSC shall meet at least once per calendar quarter during the initial year of facility operation following fuel loading and at least once per six months thereafter.

### Quorum

6.5.2.6 A majority of the permanent voting committee members, or duly appointed alternates, which shall include the Chairman or the Vice Chairman and of which a minority are from the Nuclear Power Generation Department shall constitute a quorum for meetings of the committee. In the event both the Chairman and the Vice Chairman are absent, one of the permanent voting members will serve as Acting Chairman.

### Review

6.5.2.7 The following subjects shall be reported to and reviewed by the Committee insofar as they relate to matters of nuclear safety:

- a. The safety evaluations for 1) changes to procedures, equipment or systems and 2) tests or experiments completed under the provision of Section 50.59, 10 CFR, to verify that such actions did not constitute an unreviewed safety question.
- b. Proposed changes to procedures, equipment or systems which involve an unreviewed safety question as defined in Section 50.59, 10 CFR.
- c. Proposed tests or experiments which involve an unreviewed safety question as defined in Section 50.59, 10 CFR.
- d. Proposed changes in Technical Specifications or licenses.

Safety Evaluation

Consolidated Edison Company of New York, Inc.  
Power Authority of the State of New York

Indian Point Unit 3

Docket No. 50-286

August 26, 1976

## Safety Evaluation

The proposed changes to section 6.5.2 of the Indian Point Unit 3 Technical Specifications are submitted in response to an oral request from the Office of Inspection and Enforcement - Region I inspector. The changes would clarify the permanent voting membership and quorum requirements for the Nuclear Facilities Safety Committee (NFSC). This clarification would eliminate the possibility of misinterpretation and render the technical specification requirements consistent with the NFSC Charter.

The proposed revisions to Figure 6.2-2 would reflect pending changes in employee titles. These revisions would only represent title changes and would not alter the responsibilities or functions of the personnel involved.

The proposed changes do not in any way alter the safety analyses performed for Indian Point Unit 3. The proposed changes have been reviewed by the Station Nuclear Safety Committee and by the Con Edison Nuclear Facilities Safety Committee. Both committees concur that these changes do not represent a significant hazards consideration and will not cause any change in the types or increase in the amounts of effluents or any change in the authorized power level of the facility.
