Director, Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Attention: Mr. Albert Schwencer, Chief
Operating Reactors Branch No. 1
Division of Operating Reactors

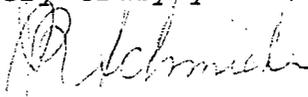

Subject: Indian Point 3 Nuclear Power Plant
Docket No. 50-286

Dear Sir:

By letter dated February 8, 1979 (IPN-79-3), the Power Authority requested an extension of time to April 16, 1979 to submit a license amendment application to incorporate the requirements of 10 CFR Part 50, Appendix I into the Indian Point 3 facility Technical Specifications.

The Power Authority finds that it still requires additional time to complete its response. The Authority is coordinating its proposed Technical Specification changes for the Indian Point 3 facility with that for our FitzPatrick facility to present a consistent position on this item. Additional Plant Operating Review Committee meetings and Safety Review Committee meetings must be scheduled before the submittal will be completed. We now plan to respond by April 30, 1979.

Very truly yours,

Joseph R. Schmieder
Chief Engineer
