Subject: Re: Pohakuloa/NRC

Thank you for your reply. I am glad that you have added my comments to the Adjudication

Docket. I needed to make sure that the permit for Depleted Uranium is considered in this way:

1. There is no legal lease for Pohakuloa that would cover even the half life of Depleted Uranium.

2. The Bunker that they have already started to build has been, according to eye witnesses, made out of a nearby hill/mountain side that they do not have an EIS/EA or cultural impact statement to destroy.

3. The Lease that Pohakuloa does have states that they are to restore the lands and not contaminate the water. They cannot be restoring if they are destroying.

4. The Hawaiians who have a right to consultation on these matters do NOT want depleted uranium stored here.

5. The Depleted Uranium was not on the original lease nor is it equal to an "Atomic Simulator" because it is not "Simulated" it is real radioactive material.

6. Testing for the road straightening revealed that there was anthropogenic or military use of the land that provided background radiation, the report states that uranium rich rocks do not occur in Hawaii. The "Background Tests" must be in comparison to areas that have never had any military use, to get a true reading.

7. In a 2008 meeting with Mr. Sanborn, the American Indian Liaison, we discussed Depleted Uranium with Martha Ross, Kai Markel, Environmental Branch of the Pentagon, and several other Military personnel...I attended this meeting for Isaac Harp and his uncle who are Hawaiian. I was requested by OHA to notify any NHO (Native Hawaiian Organizations) to attend the meeting. I was asked to represent also the Royal Order of Kamehameha, the Kupuna Council, and several other groups. I typed up their comments and gave them to the Liaison. One of the statements was, "If you deny that there is Depleted Uranium at Pohakuloa, and we find out later that Depleted Uranium was used here at Pohakuloa, it would amount to a Lease Violation and the Lease should be terminated.

8. The DLNR Land Agent of Hilo also said that he felt the Military had violated their lease and because of mismanagement an eviction was possible.

9. The Cultural Resource Manager for Pohakuloa showed us the map and we came to realize that the impact zone is much larger than the specified area on the lease. The CRM staff said they are not allowed into the area to see what needed to be saved. We asked if the military could use air surveillance....but CRM stated that the military said, "That wasn't working for them." and

that CRM couldn't go in because of unexploded ordinance. For Hawaiians this is called "Forced Neglect" a violation of Sect. 106.  
10. The Military/NRC met with the people in Hilo, but I must repeat that the head army radiologist told me that military funding may be cut and monitoring may be minimal at best.

FYI:

A. Please also let someone know....an Anchorage newspaper confirmed that the military is using the Big Island of Hawaii for "Military Crowd Control Tests" using HAARP. This was also confirmed by a Black Hawk reserve....and also correlated to super low frequencies that people picked up on their scanning equipment coming from the direction of Alaska. Social degradation, spikes in domestic violence, suicide, etc. was correlated to HAARP use. There is no Environmental Impact Statement or anything that protects the people here from the use of HAARP in test experiments...please help us.

B. Please be aware of the IR4 Worm Drive, non-infreredable, no nuclear signature, Chinese cloaking device sub that is using the International Seabed Authority's AREA for its Nuclear Capacity. The sub was caught just 13 miles off the coast of Ka'u. It was then stationed 213 miles away from the Big Island. The Naval Reconnaissance Mission (By Plane) to observe this sub when it was near a certain island was unsuccessful. There has been heavy activity for retrieval of strategic metals by Korea and China and importing of hazardous waste into Hawaii from mining that has been going into cement (and drywall)....(Contact former mayor Harry Kim)
