Division of Operating Reactors  
U.S. Nuclear Regulatory Commission

Dear Mr. Reid:

My letter of September 20, 1976 forwarded to you a partial response to your August 12, 1976 information request relating to the effects degraded grid voltage may have on plant operation. At that time it was expected that the remainder of the information would be available by the end of the year. All of the vendor data necessary to complete our response to your inquiry has not as yet been received. Our present estimate for providing the remaining information is April 1, 1977.

Very truly yours,

*William J. Cahill, Jr.*
