Division of Operating Reactors  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Reid:

Your letter of November 5, 1976 indicated that the modifications to the Indian Point Unit No. 3 main steam isolation valves proposed in my letter of October 14, 1976 were acceptable and requested a more specific schedule for implementing the proposed modifications.

These modifications are presently scheduled for completion during the unit's first refueling outage now scheduled for the Spring of 1978.

Very truly yours,

William J. Cahill, Jr.  
Vice President

REGULATORY DOCKET FILE COPY

Dear Sirs,

The Cooling Towers which your body has ordered to be constructed to serve the Indian Point Nuclear Energy plants, will clearly become a physical and visual assault upon our environment. Our home is located less than a mile from that site and we are gravely concerned that our climate and our very lives will be seriously altered by these immense structures and their outpourings.

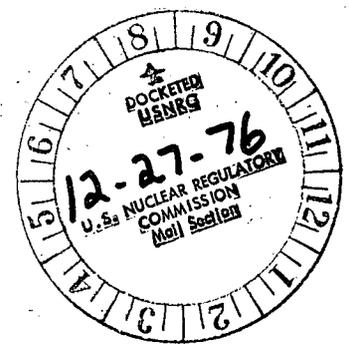

We respectfully request that you immediately declare a moratorium on any such construction while an investigation of less noxious alternatives is conducted. We support the Town of Buchanan's efforts in this matter. I believe that several alternative methods of cooling the water exist which would not represent such a gross environmental threat.

Yours sincerely,

*G.R. Woolhouse*
