Dear Mr. DeYoung

Your letter dated July 5, 1973 requestēd within 45 days a review of the design of liquid tanks that contain radio-activity with regard to possible overflow to other than a controlled water pathway to the environs.

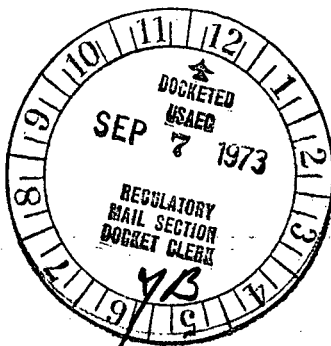

This review is still in progress and additional time is needed for its completion. Con Edison requests that the deadline for submitting the results of this review be extended to September 24, 1973.

Very truly yours
