**EVENT DESCRIPTION**

02 For Information Only: Unit No. 3 was removed from service on April 4,  
 03 1977 for a scheduled outage, to replace the internals of No. 31 safety  
 04 injection pump. Analysis of previous surveillance tests indicated that,  
 05 while the pump performance was satisfactory, a gradual deterioration of  
 06 flow output was evident. [TEIR-77-3-2].
