Mr. Robert W. Reid, Chief
Operating Reactors Branch #4
Division of Operating Reactors
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Indian Point 3 Nuclear Power Plant
License Takeover

Dear Mr. Reid:

This letter is intended to confirm our position that the Operating License takeover submittal should be given the highest priority for NRC review.

Other items which have been submitted for NRC review, in order of priority, are as follows:

1. Environmental Technical Specification
2. Operations at 100% power
3. ECCS Analysis

Should other items arise which require a reordering of priorities, the Power Authority will get in contact with NRC to discuss various possibilities.

While we understand the heavy workload that exists in NRC, we do hope that staff availability will permit you to review some items in parallel and thereby save time that the Power Authority can ill afford to lose.

Very truly yours,

George T. Berry

Re: Consolidated Edison Co. of New York, Inc. (Indian Point Station, Unit Nos. 1 and 2) Docket Nos. 50-3 and 50-247; and Consolidated Edison Co. of New York, Inc. and Power Authority of the State of New York (Indian Point Station, Unit No. 3) Docket No. 50-286.

Dear Mr. Case

Our letter of June 27, 1977 informed you of a change in primary responsibility for conduct of the nuclear environmental monitoring program and long term or life-of-the-plant type environmental monitoring programs. In addition, effective Friday, July 1, 1977, a Manager, Operations Services was appointed who reports to the Assistant Vice President, Power Generation Operations and to whom the Chief Chemical Engineer reports. Therefore, in accordance with this organizational change the Senior Engineer, Environmental, Nuclear and Gas Testing, now reports via the Division Chemist, Chief Chemical Engineer and Manager, Operations Services to the Assistant Vice President, Power Generation Operations.

For your information, attached is a revised organization chart depicting this change. Please note that we will be submitting an application for an amendment to the Environmental Technical Specification Requirements for all three units at Indian Point to reflect this change.

Very truly yours
