I.E. Bulletin 78-12, 12A and 12B

Dear Mr. Grier:

Three copies of a document entitled "Information Requested by I.E. Bulletin 78-12, Atypical Weld Material in Reactor Pressure Vessel Welds", were submitted directly to the NRC by Combustion Engineering, as permitted by Supplement A to the Bulletin.

Based on our review of this report and Westinghouse correspondence concerning their review and audit of the report, we feel that the generic report adequately represents data for the Indian Point 3 Reactor Pressure Vessel Welds.

Very truly yours,

J. P. Bayne
Resident Manager
