NOTE TO MR. HENDERSON

REQUEST FROM SENATOR GOODELL'S OFFICE, 2/20/69

Oscar Stradinger called re a call he had from Senator Goodell's office concerning Indian Point #3. Stradinger said they weren't familiar with the project and were trying to educate themselves on the matter. They were particularly interested in pollution, especially thermal pollution.

I said the Safety Evaluation, containing the Fish and Wildlife Report and the ACRS report, was being prepared (we sent Stradinger a copy for Goodell on 2/24/69). Stradinger was also going to send a copy of "Licensing of Power Reactors" and a copy of Tape's December speech before the ANS which describes our procedures and authority re thermal effects.
