FACILITY LICENSE APPLICATION FILED BY CONSOLIDATED EDISON COMPANY OF  
NEW YORK, INC., INDIAN POINT STATION UNIT NO. 3, DOCKET NO. 50-286

I am forwarding a copy of a facility license application, including Volumes 1 and 2 (Parts A and B) of the Preliminary Safety Analysis Report for the Indian Point Nuclear Generating Unit No. 3, filed by Consolidated Edison Company of New York, Inc., for the proposed construction and operation of a third pressurized water nuclear reactor, Indian Point Station Unit 3, at the company's site in Westchester County, New York. The proposed Unit 3 is designed for initial operation at approximately 3025 Mwt with a net electrical output of approximately 965 megawatts. The applicant estimates the reactor will have an ultimate capacity of 3217 Mwt with a net electrical output of 1033 Mw.

At such time as additional construction cost data are available, we shall forward the information to you with the request that you provide Mr. Charles A. Lovejoy, Office of the Controller, with your comments as to the reasonableness of the applicant's estimates.

When preparing your comments, please send a copy to this office, and return the enclosed documents at that time.
