The Safety Evaluation Report which provides our evaluation of the Quality Assurance Program proposed for the operation of Indian Point Nuclear Generating Unit No. 3 is enclosed. This evaluation is based on our review of the Final Safety Analysis Report, as amended (FSAR).

We have concluded that the Quality Assurance Program described for the Indian Point Nuclear Generating Unit No. 3 complies with the requirements of Appendix B to 10 CFR 50 and is acceptable for facility operation subject to satisfactory resolution of the staff's position contained in the letter from R. C. DeYoung to Mr. William Cahill of Consolidated Edison Company (CE) dated March 30, 1973. Regulatory requested CE to make, by July 1, 1973, a commitment to implement both the requirements and recommendations of ANS 3.2, draft No. 8, which is part of Regulatory Guide 1.33, or to provide and justify alternatives by that date. CE committed in a letter dated April 12, 1973 to implement the requirements and recommendations of Section 4.0 to ANS 3.2, draft No. 8, and agreed to provide its response on the remaining sections by July 1, 1973.
