Gentlemen:

Enclosed is the Union of Concerned Scientists' Petition for Decommissioning of Indian Point Unit 1 and Suspension of Operations of Units 2 and 3.

The bases for this petition are as follows:

- (1) Indian Point Unit operated from 1962-1974 with a "provisional" operating license. It lacks basic safety features, such as adequate emergency core cooling and has therefore not operated since 1974. Its license should be immediately revoked and the plant decommissioned according to NRC rules.
- (2) There are grave questions about the suitability of the site for nuclear power generation.
- (3) Serious safety problems exist at both Units 2 and 3.

The petition demonstrates that the continued operation of Indian Point Units 2 and 3 present a clear and present danger to the millions of persons who live in the areas surrounding the site. This danger arises both from the fact that the site may be inherently unsuitable and because of specific safety and design problems which affect the plants.

Page 2

Despite their relative youth, Indian Point Units 2 and 3 are relics of the regulatory past. This is vastly compounded by the fact that they are sited at the edge of an enormous and vulnerable urban area.

In the past, petitions disclosing safety problems at operating plants have been accorded a low priority by the Commission. Now, the accident at Three Mile Island has graphically demonstrated that serious accidents can happen. UCS believes that the time has come for the Commission to face up to the implications of this event. There can be no better starting place than Indian Point.

Very truly yours,

Ellyn R. Weiss
