To Whom It May Concern:

As a resident of New York City, whose life is endangered by the Indian Point nuclear reactors, I demand immediate shutdown. Ten percent of the population of this country lives within 60 miles of the plants. The risk is too great!

Your comment would be appreciated on this crucial matter.

Sincerely,

Mark W. Laszlo

P.S. More leakage at Indian Point?
Can Ed wants us to pay for repair?
More birth defects & Cancer? NO!
