Docket No. 50-286

SEP 10 1968

Lt. Col. Myron D. Snoke, Director  
 U. S. Army Coastal Engineering  
 Research Center  
 5201 Little Falls Road, NW.  
 Washington, D. C. 20016

Dear Lt. Col. Snoke:

On April 25, 1967, Consolidated Edison Company of New York, Inc. filed an application with the Commission for a license to construct and operate the Indian Point Nuclear Generating Station Unit No. 3 at its site on the east bank of the Hudson River in Westchester County, New York.

In the course of our review, it has been determined that the comments of the appropriate staff of the Coastal Engineering Research Center are desirable with respect to the evaluation of water surge and wave runup for this reactor project.

The application which includes Exhibit B, Volumes I and II, and Exhibit B, Part B, Volume II, and First Supplement (Amendment No. 1) thereto, is enclosed. Your attention is particularly invited to item 18 c. and d. of the supplement.

In view of the scheduling of hearing in this case, your prompt review and comments will be appreciated.

Sincerely,

Original signed by  
 Roger S. Boyd  
 Roger S. Boyd, Assistant Director  
 for Reactor Projects  
 Division of Reactor Licensing
