National Oceanic and  
Atmospheric Administration  
Air Resources Laboratory  
Gamax Building  
8060 13th Street  
Silver Spring, Maryland 20910

Dear Dr. Van der Hoven:

In accordance with arrangements for assisting the Site Analysis Branch, you are herein requested to review the meteorological aspects of the plants listed below. The appropriate Safety Analysis Reports not previously supplied will be forwarded to you under separate cover. We would appreciate receiving your comments and letter report based on the review schedule also to be provided separately.

Indian Point Nuclear Generating Unit No. 3

The application was filed by Consolidated Edison Company for an operating license and docketed under No. 50-286.

Grand Gulf Nuclear Station Units 1 and 2

The application was filed by Mississippi Power and Light Company for a construction permit and docketed under No. 50-416/417.

Reimbursement for services rendered in connection with reviews should be charged to Contract No. AT(49-1)-3432.

Sincerely,

*W*

William P. Gammill, Chief  
Site Analysis Branch  
Directorate of Licensing
