DEC 19 1967

Docket No. 50-286

Mr. Leonard Murphy
 Chief, Seismology Division
 U. S. Coast & Geodetic Survey
 ESSA - Washington Science Center
 Rockville, Maryland 20852

Dear Mr. Murphy:

Consolidated Edison Company of New York has filed an application with the Commission for a permit to construct and a license to operate Indian Point Station Unit 3. The Commission did not request comments from the Coast and Geodetic Survey concerning Unit 3, since it was felt that the comments submitted on June 23, 1966, would suffice. It has been determined, however, that an updating of the Coast and Geodetic Survey comments submitted for Unit 2 is desirable.

In this connection, copies of the application, Exhibit B, Volumes I and II and Exhibit B, Volume II Part B, are enclosed for review by the Coast and Geodetic Survey concerning the seismological characteristics of the proposed reactor location which may have a bearing upon our evaluation of the suitability of the proposed site.

In view of the scheduling of hearing in this case, your prompt review and comments will be appreciated.

Sincerely yours,

Original Signed by
 D. R. Muller
