Docket No. 50-286

Mr. Melvin A. Monson
 Branch of Permits
 Division of River Basin Studies
 Bureau of Sport Fisheries and Wildlife
 U. S. Department of the Interior
 Washington, D. C. 20242

Dear Mr. Monson:

In accordance with the understandings which were reflected in Secretary Udall's letter of March 20, 1964 to Chairman Seaborg, I am forwarding Volumes 1 and 2 (Parts A and B) of the Preliminary Safety Analysis Report filed by Consolidated Edison Company of New York, Inc., for the proposed construction and operation of the Indian Point Nuclear Generating Unit No. 3 at the applicant's Indian Point Station in Westchester County, New York.

The Indian Point 3 reactor is almost identical in design to the Indian Point 2 reactor and is to be located on the same site. On January 17, 1966 the Fish and Wildlife Service furnished AEC its comments on the possible effects on fish and shellfish of the operation of the proposed Indian Point Nuclear Generating Unit No. 2. We shall appreciate receiving any further comments you may have concerning those features of the proposed operation of Indian Point Nuclear Generating Unit No. 3 which might have radiological effects on fish and shellfish.

Sincerely yours,

Original signed by:
 Roger S. Boyd

Roger S. Boyd, Assistant Director
 for Reactor Projects
 Division of Reactor Licensing
