CONSOLIDATED EDISON COMPANY) Docket No. 50-286
OF NEW YORK, INC.)
(Indian Point Station,)
Unit No. 3))

REQUEST FOR EXTENSION OF TIME
IN WHICH TO FILE ECCS EVALUATION

Consolidated Edison Company of New York, Inc.
("Applicant"), as applicant for an operating license
for the Indian Point Unit No. 3 facility ("the facil-
ity"), hereby requests the Director of Regulation to
extend the period in which Applicant must submit an
evaluation of emergency core cooling system ("ECCS")
performance as required by Section 50.46(a)(1) and Ap-
pendix K to Part 50 of the regulations of the Atomic
Energy Commission ("the Commission"). In conformity
with Section 50.46(a)(2), this extension request is
being submitted because an operating license "may be
issued" (in the words of the regulation) with respect
to the facility on or before December 28, 1974.

As stated more fully in the accompanying affidavits of William J. Cahill, Jr. and Robert A. Wiesemann, good cause exists to support this request for an extension. The evaluation required by Section 50.46(a)(1) of the regulations of the Atomic Energy Commission is being prepared by Westinghouse Electric Corporation ("Westinghouse"), the nuclear steam system supplier for Indian Point 3, and is expected to be completed by July 18, 1974. Westinghouse cannot provide the Indian Point 3 evaluation at an earlier date because Westinghouse is simultaneously preparing the required evaluations of ECCS performance for numerous other facilities.

Commencing on receipt of Westinghouse's evaluation, Consolidated Edison will review it and will prepare appropriate proposed changes in technical specifications or license amendments on an accelerated schedule. Assuming receipt of Westinghouse's material by July 18, 1974, Consolidated Edison will complete and submit the required evaluation for Indian Point 3 by August 30, 1974.

WHEREFORE, Consolidated Edison respectfully requests that the period in which to submit the evalua-

tion required by Section 50.46(a)(2)(ii) be extended
until August 30, 1974.
