Re: Amendment to NRC License
License No. 29-27857-01
Docket No. 030-29302
Expiration Date: ~~January~~ 31, 2011

December

Dear Mr. Lodhi,

We are requesting the following addendum/ revision to our current License No. 29-27857-01

We are formerly requesting relief from our license requirement, in which our personnel must wear radiation dosimeter badges. As you are familiar, we work with small amounts of radioactive material contained within our portable gauges. The gauges are utilized in part on a short term basis where we perform quality control on construction projects.

We believe that our employees are very familiar and follow all the requirements associated with properly and safely operating our gauges. We have reviewed our employees Radiation Dosimetry reports for the last calendar year. Within these reports, our employees test results indicate either a minimal to very low readings on the badges during the referenced time frame. The report illustrate that our employees are very familiar and follow all the requirements associated with properly and safely operating our gauges.

Therefore, we are requesting this relief, due to the financial cost associated with maintaining this requirement. During this economic downturn, we believe that this operational expense can be minimized, to only using badges that are monitored on a quarterly basis. We believe that this could be performed without placing our employees in harms way.

Thank you in advance for your cooperation regarding this matter. If you require additional information please feel free to call.

Sincerely,

TRC Engineers, Inc.

Mario R. Marra, RSO
Director of Development,
Geotechnical and Construction Services

Charles E. Malson
Principal
