Washington, D. C. 20545

Attention - Mr. Samuel W. Jensch, Chairman

As Acting Commissioner of Parks, Recreation & Conservation in the City of Yonkers I wish to lend my support to Con Edison's application for a permit to construct a third nuclear station at Indian Point.

The benefits we of Westchester will derive from this plant are many. As Acting Commissioner of Parks, Recreation & Conservation my prime concern is for added recreational facilities in Yonkers. However, due to increases in population our facilities will soon need to be expanded and improved. The funds derived by the County of Westchester from taxes on this new plant will help provide facilities that can be used to enhance the leisure hours of our residents as well as provide many hours of recreation and education at the plant itself.

For these reasons, I respectfully request that the Committee to grant Con Edison's request for a construction permit.

Thank you.

Sincerely,

Louis J. Tartaglione
