Gegenstand / Objet / Oggetto:

Dear Dr. Beck:

May I, once again, ask your help?

At present there is under way in Switzerland a campaign of anti-atomic people in order to influence the public against the construction of further atomic power plants. One of the main sources of information which is used by these people is the "Story Nobody Prints" by Mrs. Mary Hays Weik in New York, a pamphlet of which you may have heard.

As I learn just now, this lady has taken part as a third party in the Hearings before an Atomic Licensing Board some time this year, on the Indian Point Reactors Nr. 2 and 3, where she has presented evidence as to a very high incidence of leukaemia in Montrose, a small town close to the site of the operating reactor Indian Point Nr. 1. As it must be expected that this new information, disclosed at the Hearings, will not be left aside by the people over here, I should like to learn more on the nature of the leukaemia statistics as they really are in this town and besides on the answer the Board has given to Mrs. Weik, be it in general or in detail.

Sincerely yours,

P. Courvoisier
