Re: Consolidated Edison Company of New York, Inc.
(Indian Point Unit No. 3), Docket No. 50-286

Gentlemen:

The following documents are being delivered to you under separate cover in response to some of your inquiries at the Prehearing Conference held on February 6, 1975. We shall endeavor to respond to the balance of your inquiries not later than March 3, 1975.

1. Economic and Environmental Impacts of Alternative Closed-Cycle Cooling Systems for Indian Point Unit No. 2, dated December 1, 1974 (3 volumes)

This is in response to your request for the Environmental Report on Closed-Cycle Cooling Systems for Indian Point 2 (Tr. 208). The specific information requested can be found on the indicated pages of this report:

Page

Costs Summary, P. i-ii; Details, P. 5-1 to 5-25
Meteorology Summary, P. 6-3 to 6-14; Reports:
Appendices A, B & C

8. Feasibility of Culturing and Stocking Hudson River Striped Bass - 1973 Annual Report, dated July 1974, prepared by Texas Instruments Incorporated
9. Second Semiannual Report Related to the Feasibility Study for Spawning, Hatching and Stocking Striped Bass in the Hudson River, dated November 1974, prepared by Texas Instruments Incorporated

Items 8 and 9 are submitted in response to your inquiry concerning studies on stocking. (Tr. 210.)

10. 1973 Hudson River Aquatic Ecology Studies - Bowline Point and Lovett Generating Stations - dated December 1974, prepared by Lawler, Matusky & Skelly Engineers, for Orange and Rockland Utilities Inc. (5 volumes)

This is in response to your inquiry for information on the impact of other plants on the river. (Tr. 212.)

In response to your inquiry concerning the monitoring program (Tr. 211), it is Con Edison's understanding that the Environmental Technical Specification Requirements of the license for Indian Point 3 will apply to all three units at the site in the same manner as the present Environmental Technical Specification Requirements apply to the two units at the site. The monitoring requirements for Indian Point 3 are expected to be substantially similar to those now required for Indian Point 1 and 2. The research program now described in the Environmental Technical Specification Requirements for Indian Point 1 and 2 was intended as the long-term research program applicable to three-unit operation. Con Edison expects that it will be incorporated in the license for Indian Point 3 without significant change.

Samuel W. Jensch, Esq.
Mr. R. B. Briggs
