Re: Consolidated Edison Company
of New York, Inc.
(Indian Point Station Unit 3)
Docket No. 50-286

Dear Mr. Scinto:

In accordance with the Regulatory Staff's request for information dated May 22, 1974, I am transmitting herewith a document entitled "Documentation for Mathematical Models of the Hudson River Striped Bass Population" dated July 1974. The program described in this submittal is the current working version of the life cycle model. Consolidated Edison is, however, considering some additional modifications of this model in the coming months (a) to reflect results of the 1973 river studies, and (b) to allow for real time simulation.

Please advise me if the Staff has any questions concerning these models. I will be happy to make the necessary arrangements if a meeting would be helpful in this regard.

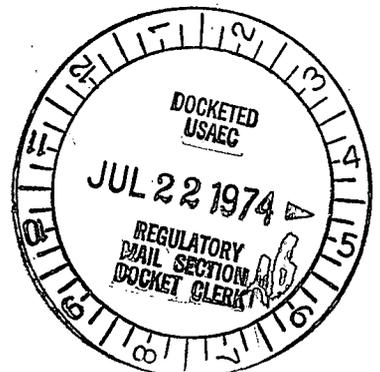

Due to the bulk of this material, I am not distributing it to the usual service list. By copy hereof, persons on that list are requested to advise me if they desire a copy.

Very truly yours,

Eugene R. Fidell
