ANSWER OF THE NEW YORK STATE ENERGY  
OFFICE\* UNDER 10 CFR 2.705 NOTICE OF  
HEARING DATED OCTOBER 12, 1976

Section 2.705 of the rules of practice provides that a party may file an answer which must concisely state:

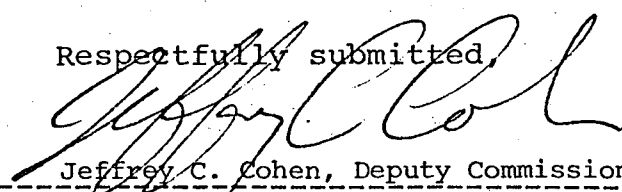

1. The nature of his defense or other position;
2. The items of the specification of issues he controverts and those he does not controvert; and
3. Whether he proposes to appear and present evidence.

The New York State Energy Office participates in this proceeding under Section 2.715(c) which section affords New York State the right to be represented on the issues to be considered by this Board and to have a reasonable opportunity to generally participate in the hearing, to interrogate witnesses, introduce evidence and otherwise advise the Commission without requiring that the State take a position with respect to the issues.

New York State does not oppose the designation of a natural draft, wet cooling tower as the preferred closed-cycle cooling system for Indian Point Unit No. 3. The State takes the position, based on the information now available, but reserves its right to modify its position in the event any new evidence or data becomes available. We intend to participate in all of the hearings and in the interrogation of witnesses. Should we decide to present any affirmative testimony we will do so in accordance with the provisions of Section 2.715(c).
