May 7, 1969

J. P. O'Reilly, Chief, Reactor Inspection & Enforcement Br.,
Division of Compliance, Headquarters

CONSOLIDATED EDISON COMPANY - INDIAN POINT NO. 3
DOCKET NO. 50-286

The attached report of visits to the subject facility on
March 18 and 24, 1969, is forwarded for information.

This inspection was a Pre-Construction Permit Hearing review
of the actual status of the applicant's quality control program.
Most of the program is in the planning stage. Few procedures
had been written and approved as of the time of the inspection.
Con Ed has formed an internal Task Force to expedite the
documentation of the program. It is estimated by Con Ed that
by July 1, 1969, the documentation will be essentially completed.

A sufficiently documented program is in effect to control the
work which has been authorized and in progress at this time.

N. C. Moseley
Senior Reactor Inspector
