J. P. O'Reilly, Chief, Reactor Inspection & Enforcement Br.,
Division of Compliance, Headquarters

CONSOLIDATED EDISON COMPANY - INDIAN POINT NO. 3
DOCKET NO. 50-286

Attached is a report of a visit to the Combustion Engineering shop in Chatanooga, Tennessee on January 16 - 17, 1969, to inspect the reactor vessel for the subject facility. The report is forwarded for information. No items of nonconformance and no safety items were identified.

The inspector found Combustion Engineering's quality control system to be effective in fabrication of the vessel. An agent of the licensee is also auditing vessel fabrication. The vessel hydrostatic test is presently scheduled for April, 1969. We plan to witness this test.

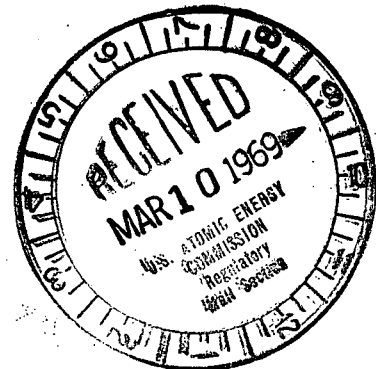

N. C. Moseley

N. C. Moseley
Senior Reactor Inspector
