Mr. Dennis Zaccardi
88 Romaine Avenue
Jersey City, New Jersey 07306

Dear Mr. Zaccardi:

In reference to your letter of April 24, 1974, you inquired as to the date for the public hearing for licensing of the operation of the Indian Point Nuclear Generating Plant Unit No. 3 presently owned by Consolidated Edison Company of New York, Inc. The hearing for limited appearances originally scheduled for April 25, 1974, was postponed because of the slippage in the construction schedule for the plant from February 1974 to November 1974. Since the cancellation of the April 25 hearing, no definite date has yet been established by the Atomic Safety and Licensing Board (ASLB); however, a tentative date has been proposed by the applicant to start the hearing by September or October, 1974.

Prior to setting the date for limited appearances, the Regulatory staff must issue the Final Environmental Statement (FES). A public announcement as to the date, time and place for the limited appearances will be issued by the Atomic Energy Commission. A notice will appear in the Federal Register and the local newspapers. At that time, we will be glad to furnish you a copy of the public announcement.

Thank you for your inquiry and we will be glad to keep you informed as to the schedule for the public hearing.

Sincerely,

Original signed by Daniel R. Muller

Daniel R. Muller, Assistant Director
for Environmental Projects
Directorate of Licensing
