Re: Docket No. 50-286
Indian Point Unit No. 3

Mr. George W. Knighton, Chief
Environmental Projects Branch No. 1
Directorate of Licensing
United States Atomic Energy Commission
Washington, D.C. 20545

Dear Mr. Knighton:

In reference to our letter of March 15, 1973, we wish to inform you that a Supplement to the Environmental Report containing information requested in your letter of March 5, 1973 will be submitted on April 30, 1973. This submittal has gone beyond our planned date of mid-April because of our desire to have our submission be as responsive as possible to your request. This has necessitated the acquisition and review of additional information.

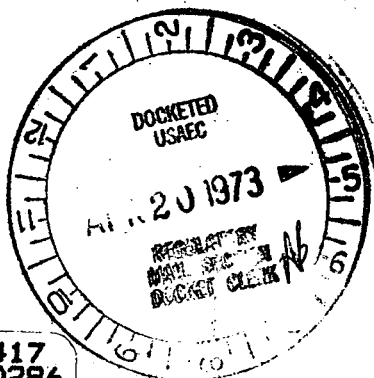

As discussed in our March 15, 1973 letter we do not have at hand data of a supplementary nature in certain areas for which the staff desired additional information. These involve detailed meteorological data at the site, additional studies concerning thermal discharges from the facility, and additional data on the aquatic ecology in the region.

This information will be provided as data is collected. It is anticipated that meteorological and thermal discharge data will be available in complete form in about one year. Aquatic ecology information will continue to expand over the next five years.

Sincerely,

William J. Cahill, Jr.
Vice President
