Re: Indian Point Unit No. 3
Docket No. 50-286

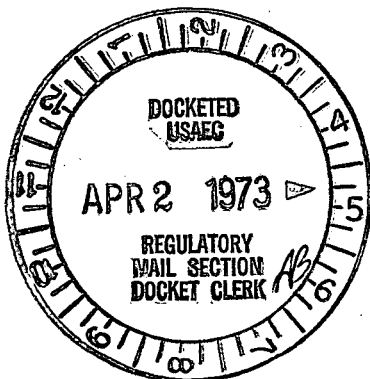

Mr. George W. Knighton, Chief
Environmental Project Branch No. 1
Directorate of Licensing
United States Atomic Energy Commission
Washington, D. C. 20545

Dear Mr. Knighton:

In your letter of March 26, 1973, to me, you requested the date that we will submit the supplement to the Environmental Report concerning the biological effects of plant operation and the biological effects of entrainment. The supplement will be submitted on April 6, 1973.

We regret the delay in this submittal, which has been occasioned by our attempt to incorporate the most recent testimony from the Indian Point 2 licensing proceeding into this supplement to the Environmental Report for Indian Point 3.

Very truly yours,
