Re: Consolidated Edison Company
of New York, Inc.
Indian Point Unit No. 3
AEC Docket No. 50-286 50-247

Gentlemen:

Appendix D of Part 50 of the Commission's regulations requires that Consolidated Edison, the Applicant in the above-captioned proceeding, file supplemental environmental information no later than November 8, 1971.

The urgent need for use of Applicant's Indian Point Unit No. 2 has necessitated a decision to give priority to completing regulatory matters prerequisite to the licensing and full operation of that unit by the summer of 1972. Consequently, personnel needed to complete the Unit No. 3 supplemental environmental information have been working full time on Unit No. 2 matters (AEC Docket No. 50-247) except for preparation of the statement submitted pursuant to Section E(3) of Appendix D supporting continued construction of Unit No. 3 pending completion of the NEPA review. Included in this work are:

1. A supplemental environmental report for Unit No. 2 as required by Section A(5).
2. Additional information required by the AEC for the environmental report on Unit No. 2.
3. Answers to questions from the AEC Staff.
4. Motion for fuel loading of Unit No. 2 and supporting papers.
5. Motion for limited operation of Unit No. 2 and supporting papers.

LB

6. Preparation of testimony to be submitted at the hearing for a Unit No. 2 operating license, which resumed November 1.

The Company is also now responding to environmental questions submitted by intervenors in the Indian Point 2 hearings. Eighty-two such questions have been received thus far.

It is respectfully requested, therefore, that the time for filing this supplemental information be extended to December 8, 1971.

Very truly yours,
