March 24, 1971

Note to R. S. Boyd
R. C. DeYoung

RECEIPT OF ENVIRONMENTAL REPORTS FROM APPLICANTS

In reviewing the status of environmental reports and environmental statements in conjunction with the overall schedule for applications, I note that the lack of environmental reports from applicants on several plants is rapidly becoming a critical path item. Those plants which have become, or are rapidly becoming critical are as follows:

70-367 Baily 3-27-71
50-285 Fort Calhoun 3-27-71
50-286 Indian Point 3
60-277-318 Peach Bottom
50-369-210-396 Browns Ferry
60-373-374 LaSalle

Chris Henderson has suggested, and I concur, that the project leaders call the applicant and advise them that unless the environmental report is received in the very near future, the issuance of licenses may be delayed. The telephone call should be followed up by a letter to the applicant.

Mr. William J. Cahill, Jr.
Vice President for Engineering
Consolidated Edison Company of
New York, Inc.
4 Irving Place
New York, New York 10003

Dear Mr. Cahill:

In order to assist you in the preparation of environmental reports required by the Commission's regulations implementing the National Environmental Policy Act of 1969 (10 CFR Part 50, Appendix D), I am pleased to provide the enclosed draft "Guide to the Preparation of Environmental Reports for Nuclear Power Plants." As referenced in section 2.2 of the draft Guide, I also am enclosing a list of the applicable clearinghouses listed in EOB Circular A-95 for the State(s) in which you have plants under construction or proposed.

As noted in the draft Guide, it has been issued for comment and interim use, and we would urge that you try to make any environmental report which you may submit as complete as possible. In the event that you already have submitted a report which is under review by the AEC or has been made available to applicable Federal and State Agencies for comment, we would urge that you review the report and if additional information called for in the draft Guide is available, that you submit the information to the AEC as soon as possible in order that any delays may be avoided in the preparation of the final detailed statement. In addition, we would, of course, be pleased to have any comments you may have concerning the draft Guide.

With respect to the water quality certification referred to in section 2.3.3 of the draft Guide, I am enclosing for your information a Notice of Proposed Rule Making on "State Certification of Activities Requiring Federal License or Permit" which was published by the

Environmental Protection Agency (EPA) in the Federal Register on February 5, 1971. We deem that, within the context of the Atomic Energy Act of 1954, as amended, and AEC regulations and procedures, the phrase "where actual construction of a facility . . . lawfully commenced" as used in the EPA Notice of Proposed Rule Making and in section 21(b)(7) of the Federal Water Pollution Control Act, as amended, refers, in the case of a nuclear facility, to the commencement of construction after receipt of a construction permit.

Sincerely,
(signed) Harold L. Price

Harold L. Price
Director of Regulation
