Subject: FW: NRC GLE EIS: data request to GLE

Julie,

Below are a few more questions from our air quality reviewer. These will be the topics that we would like to discuss at 3:00 pm.

Also, we have two general questions.

Question 1 - What is the current status of GLE's permits? In many instances, it is stated that permits will be applied for. Has GLE applied for any permits, if so, what is the status of review?

Question 2 - Has GLE secured any contracts for fuel?

Thanks,

Jennifer

Subject: NRC GLE EIS: data request to GLE

Halil,

The following is the list of items that we have to confirm or discuss with the GLE applicant:

- Per the GLE ER, GEH collects some meteorological data at the Wilmington site. What are the meteorological parameters being collected (e.g., wind speed and direction), at what instrument height (e.g., 10 m or 60 m), and what period of record (e.g., January 2003 – June 2004)?
- Historically, many hurricanes have hit the Wilmington area. Have there been any human injuries or instances of structural damage at GE's Wilmington Site from any past hurricanes?
- Some calculation errors and unreferenced statements were found in Tables 4.6-1 through 4.6-9 of the RAI Response dated November 24, 2009, regarding assumptions, emission factors, and emission inventories associated with construction and operation of the proposed GLE Facility. We should ask the GLE applicant to provide all spreadsheets which were used in emission inventories. After reviewing their spreadsheets, I will prepare a list of questions and resolve them with the GLE applicant.

Thanks,

Young-Soo
