Facility Operating License Nos. DPR-77 and DPR-79
NRC Docket Nos. 50-327 and 50-328

**Subject: Correction of Errata for Technical Specifications Change 07-05 –
Upgrade of Emergency Core Cooling System Requirements
(TAC No. ME1115 and ME1116)**

Reference: Letter from TVA to NRC dated April 21, 2009, "Sequoyah Nuclear Plant (SQN) - Units 1 and 2 - Technical Specification (TS) Change No. 07-05, Emergency Core Cooling System (ECCS)"

By letter dated April 21, 2009 (Reference), Tennessee Valley Authority (TVA) submitted a license amendment application to NRC to revise the Sequoyah Nuclear Plant (SQN) Units 1 and 2 Technical Specifications (TSs) to upgrade the emergency core cooling system TS. The enclosure provides a correction of errata that was inadvertently included in the application as described below.

The Index Page for Unit 2 did not include mark-ups showing a revision to the TS Bases page numbering. The enclosure provides the corrected marked-up page. TVA has determined that the additional information provided by this letter does not affect the no significant hazards considerations associated with the proposed TS changes. The proposed TS changes still qualify for a categorical exclusion from environmental review pursuant to the provisions of 10 CFR 51.22(c)(9).

There are no new regulatory commitments in this letter. If you have any questions about this change, please contact Beth A. Wetzel at (423) 843-7170.

I declare under the penalty of perjury that the foregoing is true and correct.
Executed on this 26th day of January, 2009.

Respectfully,

R. M. Krich
Vice President
Nuclear Licensing

Enclosure: Marked-up Index page for TS Change 07-05
