REGULATORY DOCKET FILE COPY

July 19, 1979

RE: Indian Point Unit Nos. 1, 2&3
Docket Nos. 50-3, 50-247, 50-286

Mr. Boyce H. Grier, Director
Office of Inspection and Enforcement
Region 1
U. S. Nuclear Regulatory Commission
631 Park Avenue
King of Prussia, Pennsylvania 19406

Dear Mr. Grier

In accordance with the Environmental Technical Specification Requirements (ETSR) a new milk sampling location was chosen using data from the milch animal survey conducted this year and was chosen to be as close to the plant as possible based on the availability of milch animals in the area. The new site is Hilltop Hanover Farm.

This site replaced Guard Hill Farm as a sampling site and is located outside the 15 mrem/yr isodose line. Guard Hill Farm ceased commercial operation during Januray 1979. A January 1979 sample was obtained. The Office of Inspection and Enforcement, Region 1, was notified of the closing of Guard Hill Farm by telecommunication on February 6, 1979 which was followed up by a 30 day report dated March 6, 1979.

Monthly milk sampling at Hilltop-Hanover Farm was initiated in June 1979.

This change will be incorporated into a future revision of the Technical Specifications.

Very truly yours

William J. Cahill
