Laurie,

Weather permitting we are tentatively planning to begin remediation/decontamination activities in mid April.

Currently, our contractor, Cabrera, is putting together the detailed decontamination plans (ie Radiation protection plan, accident protection plan, nuclear material control plan, detailed work plan) and planning additional sampling.

The remediation is estimated to take 6 months to complete. Based on an April 15 start date the completion is projected to be October 15.

I will ask Cabrera to get a detailed project schedule and will forward it to you so we can plan dates for inspections.

I hope this answers your questions.

Thanks
John

John M. Uruskyj CPG

John -

I left a message with your secretary, who mentioned that you are on a conference call.

I need an update from you regarding the UNC Naval site by 10am Wednesday January 27.

When do you plan to begin the remediation work at the site?
What is being done at this site?
What is the work plan schedule?
When do you plan to complete the project?

I still need a schedule from you so that we can plan dates for inspections.

Thank you in advance.
