January 15, 2010

Director of Nuclear Material Safety and Safeguards
U.S. Nuclear Regulatory Commission
Washington, DC 20555

This letter is to advise you of the transfer of an Am-241 source and a Cm-244 source from a general license to the Midland, Michigan site specific license. There was no change in the location or ownership of the device associated with this transfer.

The sources listed below have been transferred to NRC License #21-00265-06. They will be maintained and handled in accordance with the conditions specified in this license.

Radionuclide	Manufacturer	Model Number	Serial Number	Original Activity	NRC Device Key
Cm-244	Asoma Instruments, Inc.	200	4583	100 mCi	489729
Am-241	Asoma Instruments, Inc.	200	4583	20 mCi	489713

If there are any concerns or questions on this transfer, please contact me at 989-636-1440.

Sincerely,

James R. Weldy
Radiation Safety Officer
