Re: International Isotopes Inc. ("INIS") Fluorine Extraction Process and Depleted Uranium Deconversion Plant ("FEP/DUP")

Ladies and Gentlemen:

The captioned plant will be situated approximately 14 miles west of Hobbs, Lea County, New Mexico, in Section 27, Township 18 South, Range 36 East, N.M.P.M.

To my knowledge the City has no concerns concerning INIS's proposed facilities as they relate to socioeconomic impact issues or other issues important to the residents of Hobbs.

The location of the FEP/DUP is in relatively close proximity to the City of Hobbs, but should not affect day-to-day activities or the safety of residents within the City of Hobbs and the surrounding area.

The LES facility south of Hobbs and East of Eunice and its employees and contractors have had an extremely positive impact upon Hobbs and Lea County, and we fully expect such a positive impact from the FEP/DUP West of Hobbs.

Please call if you have any questions.

Thank you very much.

Very truly yours,

CITY OF HOBBS
