Subject: Request for Comanche peak call on section 2.3

By letter dated October 19, 2009, Luminant provided its response to the staff's RAI on met. One of your files references another file called cpmixht.txt. This file should provide all of the mixing height data that was used in your SACTI runs. However, the staff did not find this, instead we found a file called mixht.tap.

We would like to have a 15 minute call to make sure we are looking at the correct file that was submitted.

thanks,

Stephen Monarque
