Re: Consolidated Edison Company of New York, Inc.
(Indian Point Station, Unit No. 2)
Docket No. 50-247

Dear Mr. Denton:

Consolidated Edison Company of New York, Inc. ("Consolidated Edison") transmits herewith three (3) signed originals and forty (40) copies of a document entitled, "Application for Amendment to Operating License," sworn to on June 19, 1980. This Application requests an amendment to the NRC's Fire Protection Safety Evaluation (SE) referenced in paragraph 2.I of the Facility Operating License No. DPR-26 and an amendment to the Technical Specifications of that license.

The proposed modifications to the Fire Protection Safety Evaluation (SE), contained in Attachment A to the Application, would delete certain requirements which have been determined to be no longer required. The proposed technical specification changes, contained in Attachment B to the Application, would establish limiting conditions for operation (LCOs) and surveillance requirements for additional fire detectors, hose stations and water supply capability to be installed during 1980 and early 1981 as part of the overall Indian Point Unit No. 2 fire protection program. These changes are being submitted as required by the letter from Mr. A. Schwencer (NRC) to Mr. William J. Cahill, Jr. (Consolidated Edison), dated January 31, 1979, which forwarded the NRC's Fire Protection Safety Evaluation (SE).

A Safety Evaluation of the proposed changes is presented in Attachment C to the Application. This Safety Evaluation includes a discussion of the schedule for completion of the appropriate facility modifications to be covered by the proposed technical specifications. Since the issuance of the

specification changes is contingent upon actual completion of the subject modifications, Consolidated Edison will inform your Project Manager for Indian Point Unit No. 2 when these modifications are completed.

As discussed in the January 31, 1979 letter, the NRC has determined that no license amendment filing fee is required for this Application. That determination is limited to those applications involving fire protection system modifications initiating from the NRC's overall fire protection program review. Accordingly, no filing fee per 10CFR 170.22 is forwarded herewith.

An Affidavit of Service is enclosed.

Very truly yours,

William J. Cahill, Jr.
Vice President
