re: Indian Point Unit No. 2
Docket No. 50-247

Director of Nuclear Reactor Regulation
ATTN: Mr. Steven A. Varga, Chief
Operating Reactors Branch No. 1
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

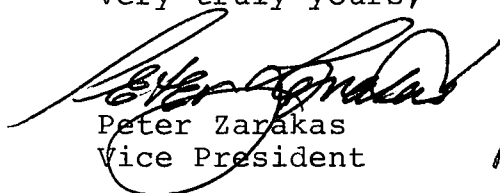

Dear Mr. Varga:

By letters dated February 27, 1980, April 10, 1980, June 11, 1980, July 2, 1980, July 7, 1980, and July 28, 1980, the NRC Regulatory Staff has requested many changes to the Indian Point Unit No. 2 Technical Specifications. Although these requests were independent, in many cases they are requiring changes to the same technical specification sections. Also, in some cases, changes are requested to sections of the technical specifications for which proposed revisions have been previously submitted to NRC and are presently under review.

Accordingly, in order to propose a cohesive, meaningful and clearly understandable technical specification package, we now plan to make one submittal to NRC which will address all of the above referenced letters. Our present estimated submittal date for this application is November 7, 1980.

Should you or your staff have any questions, please contact us.

Very truly yours,

Peter Zarakas
Vice President
