Operating Reactors Branch No. 1
Division of Licensing

Re: Consolidated Edison Company of New York, Inc.
(Indian Point Station, Unit Nos. 1 & 2)
Docket Nos. 50-3 & 50-247

Dear Mr. Varga:

Consolidated Edison Company of New York, Inc. transmits herewith three (3) signed originals and forty (40) copies of the document entitled, "Application for Amendment to Operating Licenses", sworn to on March 11, 1981. This Application requests an amendment to the Technical Specifications for Indian Point Unit Nos. 1 and 2 to effect organizational and administrative changes to facility management and technical support and to the facility organization. The subject changes were developed as part of our commitment to improve our organizational structure and functioning following the accumulation of water inside the Unit No. 2 containment on October 17, 1980. The text of the requested modifications to the Technical Specifications and a Safety Evaluation are attached to the application papers.

In accordance with 10 CFR 170.22, this Application qualifies as a combined "Class I/Class II" Amendment since it is administrative in nature and the requested changes for both units are essentially identical. Accordingly, as required by 10 CFR 170.22, enclosed is a check in the amount of \$1,600.00 as the total filing fee for this Application. This payment is being made under protest, and

Consolidated Edison reserves the right to challenge the validity of the imposition of these fees, and the basis for the determination of the amounts of the fees.

An Affidavit of Service is enclosed.

Very truly yours,

A handwritten signature in dark ink, appearing to read "John D. O'Toole", with a long horizontal flourish extending to the right.

John D. O'Toole
Vice President
