Division of Licensing

Re: Consolidated Edison Company of New York, Inc.
(Indian Point Station, Unit No. 2)
Docket No. 50-247

Dear Mr. Varga:

Consolidated Edison Company of New York, Inc. ("Consolidated Edison") transmits herewith three (3) signed originals and forty (40) copies of a document entitled, "Application for Amendment to Operating License," sworn to on August 7, 1981. This Application requests an amendment to the Technical Specifications contained in Appendix A of Facility Operating License No. DPR-26.

The proposed changes, contained in Attachment A to the Application, would establish technical specification requirements for the Indian Point Unit No. 2 alternate shutdown system. These changes are being submitted as requested by Mr. D. Eisenhut's (NRC) February 20, 1981 letter and as committed in Consolidated Edison's May 19, 1981 letter to the NRC. A Safety Evaluation of the proposed changes is presented in Attachment B to the Application.

As discussed in its January 31, 1979 letter, the NRC has determined that no license amendment filing fee is required for this Application.

That determination is limited to those applications involving fire protection system modifications initiating from the NRC's overall fire protection program review. Accordingly, no filing fee per 10CFR 170.22 is forwarded herewith.

An Affidavit of Service is enclosed.

Very truly yours,

John D. O'Toole
Vice President
