OF NEW YORK, INC.	)	
(Indian Point Station,	)	
Unit No. 2)	)	

APPLICATION FOR AMENDMENT TO  
OPERATING LICENSE

Pursuant to Section 50.90 of the Regulations of the Nuclear Regulatory Commission ("NRC"), Consolidated Edison Company of New York, Inc. ("Consolidated Edison"), as holder of Facility Operating License No. DPR-26, hereby applies for amendment of the Technical Specifications contained in Appendix A of that License. Specifically, Consolidated Edison requests that the technical specifications be revised to incorporate revised reactor coolant system heatup, cooldown and hydrostatic test pressure/temperature limitations applicable through seven (7) effective full power years (EFPYs) of reactor operation.

The specific proposed Technical Specification page revisions are set forth in Attachment A to this Application. A Safety Evaluation of the proposed changes is set forth in Attachment B to this Application. This evaluation demonstrates that the proposed changes do not represent a

significant hazards consideration and will not cause any change in the types or an increase in the amounts of effluents or any change in the authorized power level of the facility.

CONSOLIDATED EDISON COMPANY  
OF NEW YORK, INC.
