RE: Consolidated Edison Company of New York, Inc.
(Indian Point Station, Unit No. 2)
Docket No. 50-247

Dear Mr. Varga:

Consolidated Edison Company of New York, Inc. transmits herewith three (3) signed originals and forty (40) copies of the document entitled, "Application for Amendment to Operating License", sworn to on May 30, 1984. This Application requests an amendment to the Technical Specifications for Indian Point Unit No. 2 such that it more closely conforms to the model Standard Technical Specification set forth by the NRC on shock suppressors (snubbers). The text of the requested modifications and a Safety Assessment are attached to the application papers.

Generic Letter 84-13, issued on May 3, 1984, provides that snubbers need not be listed by a table contained in the Technical Specifications. Con Edison intends to delete Table 3.12-1 in a future application for a change in the Technical Specifications.

Due to the considerable time required for Con Edison to implement these changes we request that the date of implementation be finalized in future discussions with your staff.

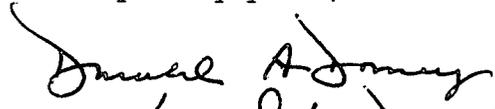

In accordance with 10 CFR 170.22 this Application qualifies as a "Class III" Amendment. Accordingly as required by 10 CFR 170.22, enclosed is a check in the amount of \$4000.00 as the total filing fee for this Application.
