Re: Indian Point Unit No. 2  
Docket No. 50-247

Director of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

ATTN: Mr. Steven A. Varga, Chief  
Operating Reactors Branch No. 1  
Division of Licensing

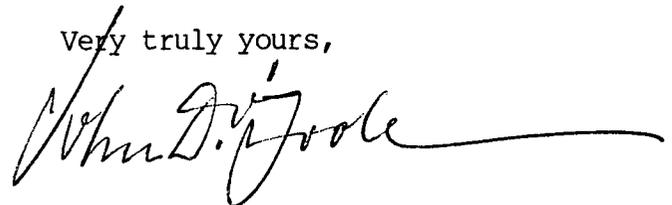

Dear Mr. Varga:

By letter dated February 28, 1985, we transmitted a document entitled "Amendment No. 2 to Application for Amendment to Operating License". That application sought to amend portions of our February 14, 1983 application to reflect revised pressure/temperature limitations for reactor coolant system heatup, cooldown, hydrostatic test and low temperature overpressure protection applicable through fifteen (15) effective full power years (EFPYs) of reactor operation.

In reviewing our February 28, 1985 submittal we have noted that certain revisions to the low temperature overpressure protection system arming temperature were inadvertently omitted. Accordingly, we are transmitting revised page 3.2-2 and Figures 3.1.A-1 through 3.1.A-3 with this letter.

Should you or your staff have any questions, please contact us.

Very truly yours,
