Re: Indian Point Unit No. 2  
Docket No. 50-247

Director of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

ATTN: Mr. Steven A. Varga, Chief  
Operating Reactors Branch No. 1  
Division of Licensing

Dear Mr. Varga:

By letter dated February 28, 1985, we transmitted a document entitled "Amendment No. 2 to Application for Amendment to Operating License". That application, among other things, sought to amend portions of our February 14, 1983 application to reflect revised low temperature overpressure protection limits applicable through fifteen (15) effective full power years (EFPYs) of reactor operation.

In reviewing those applications with Ms. M. Slosson of your staff on September 4, 1985, we noted that certain references to the low temperature overpressure protection system arming temperature require revision. Accordingly, we are transmitting revised pages 3.3-3 and 3.3-10 reflecting the appropriate arming temperature.

Very truly yours,
