Division of PWR Licensing-A

Re: Consolidated Edison Company of New York, Inc.
(Indian Point Station, Unit No. 2)
Docket No. 50-247

Dear Mr. Varga:

Transmitted herewith are three (3) originals and forty (40) copies of "Application for Amendment to Operating License", sworn to on November 26, 1985. This Application requests an amendment to the Indian Point Unit No. 2 Technical Specifications to change the $F^N \Delta H$ part power multiplier from 0.2 to 0.3. This change is being requested in order to allow optimization of future core loading patterns by minimizing restrictions on $F^N \Delta H$ at low power. A $F^N \Delta H$ part power multiplier of 0.3 has been approved for a number of operating plants such as Turkey Point, R.E. Ginna, Trojan, Cook Unit 1, Zion, Indian Point Unit 3, Point Beach and Surry.

In order to allow optimization of the core loading pattern for the next fuel cycle design (i.e., IP-2 Cycle 9), Con Edison requests that the necessary license amendment be issued no later than March 15, 1986. The issuance of the license amendment by this date is necessary in order to incorporate this change into the core design process.
